Wholesale Catalogue for Nurseries and Dealers,

WILLIAM R. PRINCE & CO.,

FLUSHING, NEW YORK.

We are now gradually winding up our extensive Nurseries, and we therefore offer great advantages to Nurseries requiring supplies, and equally good articles have never been offered at such moderate rates. This Catalogue comprises only such Trees and Shrubs as we actually possess and have ready for delivery, and is not made up, as many Nursery Catalogues are, with a mass of articles they never possessed; thereby causing only disappointment, vexation, and loss of time to applicants. The spring season opens here quite early, and trees can be packed and forwarded during the moderate periods in February, and throughout the month of March. We will forward packages by any Transportation Line or Express, &c., that may be designated, and will forward the receipt therefor to the purchaser, and there is consequently the best security for their delivery. We pack all articles in so secure a manner that they go to California, Oregon, South America, all parts of Europe, and every section of our own country, with perfect safety; and it is almost impossible for losses to occur, unless by the neglect of others. After having performed our duty in packing and forwarding, the goods are at the risk of the purchaser. Payments can be safely made by a check or draft, and where these are not to be had, remittances of bank notes can be made through the American Express, or Adams & Co., who will insure safe delivery if desired. We shall sell our trees for cash or notes that are made perfectly satisfactory by references and otherwise, and we may as well say at the outset, that in selling our stock at a sacrifice, we will not receive any doubtful security. We desire those who want our trees, to write their letters plainly to the point, stating explicitly what articles they want, and how they wish to make the payments—by cash or otherwise; and if only part is offered in cash, to state what notes or securities will be given for the balance, and name references.

The Fruit Trees we offer are stocky and full-branched, they being grown in ample space, and our Pears on the Angers Quince stock, are especially so; and not of the *Currant-bush character, called trees* in some nurseries; which, from being grown only a few inches apart, are, as a consequence, weak and unhealthy. The same remarks will apply to our Ornamental Trees; whereas a mass of *spindling apologies called trees*, are continually hawked throughout the country, they being too worthless to command any sale at home. When orders are sent for Fruit Trees in quantity, we expect them to comprise a fair average assortment; the purchaser can send a list of names sufficiently extensive, designating which he prefers having the most of, and we will execute the order as nearly as possible, sending more or less of each as convenient. As a rule, we propagate far the most of the leading and best known varieties.

Conditions.—Purchasers are entitled to the trees at the annexed prices, *only* when the quantity specified is ordered. When smaller quantities are wanted, they will be supplied to the Trade, at a discount from our General Catalogue prices, in proportion to the extent of the order.

Facilities for Transportation.—The means of transportation from New York (whence we expedite all packages), to all parts of the Union, are more frequent and rapid than from any other point, and it requires but 18 hours by railroad to Dunkirk or Buffalo, on Lake Erie.

N. B.—Orders should be directed to us at Flushing, and sent per mail.

REMARKS.

As the demand for these Seeds and Stocks, the present year, is much greater than can be supplied, the following are the only terms on which they can be furnished. The orders for seeds must be made before the end of February, accompanied by cash to the amount ordered, if they are wanted immediately; but if not wanted till spring, they will be retained, if one third of the amount is paid immediately. The Stocks must be ordered before the 15th of March, accompanied by 20 per cent. in cash, the balance to be paid at the time it is desired they should be forwarded, between this and April next. These precise terms apply only to Seeds and Stocks, and not to the sales of other Trees and Plants, which will be sold for both cash and credit. We now send you our present prices for the different kinds of Stocks; but it seems probable, from the great scarcity, that prices will continue to advance from this until the period for spring planting. We pack all so safely in boxes that not any can be injured, and only the actual cost of packing is charged. N. B.—We have just issued a **New Wholesale Catalogue for Nurseries,** comprising all other Trees, Shrubs, and Plants, at reduced rates, such as cannot fail to suit all Nurseries wanting Stock. It will be sent to all applicants. Also Catalogue No. 1, Fruit and Ornamental Trees and Plants; and No. 2, Roses, Dahlias, Bulbous and other Flowering plants, 40th edition, and No. 5, Garden and Agricultural Seeds, will be sent to applicants who have not received them.
